Experience

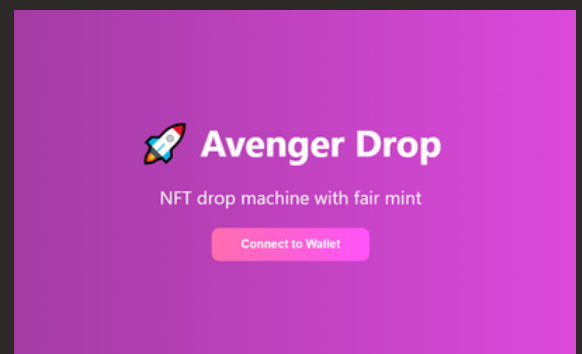

Solana Dapp

- A DAPP build on Solana Blockchain where users able to view and submit their favorite Electric Cars GIF or Images link.

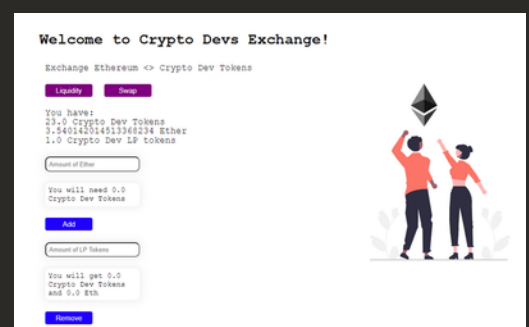

Solana Airdrop Dapp

- Users can use this Web App to mint their Marvel Avenger Themed NFT! Some Devnet Sol is required to mint successfully.

DeFi Web App

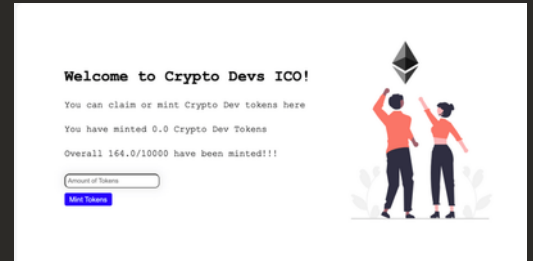

- A full fledged DeFi exchange where users would be able to add tokens into Liquidity Pools and earn a LP Tokens
- Users would first need to mint the native token first then only able to contribute

Experience

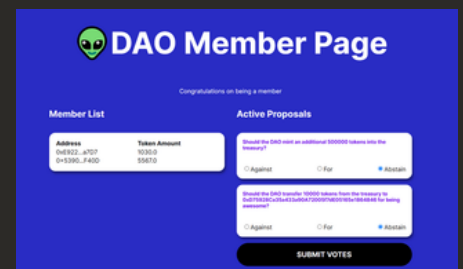

Dev Coin Token Mint

- Users can mint this native token to contribute into the liquidity pool in the DeFi app.

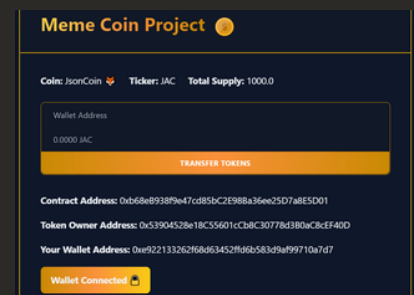

DAO (Decentralized Autonomous Organization)

- Implement a fully fledged autonomous voting system with a governance token
- Members are able to mint their NFT to become a member and earn tokens

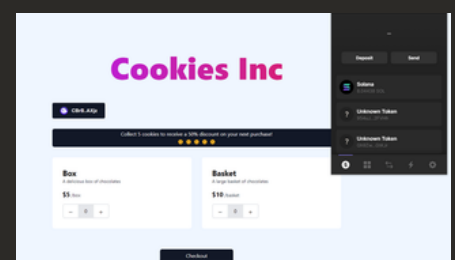

Meme Coin Project

- A fully functional ERC20 Token with burning capabilities to control supply
- Members are able to mint their NFT to become a member and earn tokens

Solana Pay Store

- An online store implemented with Solana Pay
- Users can pay through scanning the QR code with Phantom Solana Wallet and Phantom web extension

Polygon Name Service

- An app that lets you purchase your very own marvel domain name and it comes with an NFT
- Deployed on testnet feel free to try it out and get your NFT by minting a domain name
